

DPD 7801-59

19 November 1959

MEMORANDUM FOR: Security Office, Development Projects Division, DD/P  
SUBJECT : Change of Safe and Vault Combinations

1. It has been quite some time since this office was established in its present location and during that time there have been several changes in personnel.
2. There are three 3-way combination lock safes located in this office and the office itself is controlled by a 3-way combination lock on the door, making it a vault area.
3. It is requested that, for security reasons, consideration be given to having the combinations of the three safes and the door changed in the near future.
